

Amendments to the Specification

Please amend the paragraph beginning at page 7, line 6 as indicated below.

Figure 1 illustrates a process 100 according to one embodiment of the present invention. In this embodiment, an input signal may be generated at act 102. A control signal may be generated at act 104 in response to the input signal. The control signal 104 may then be communicated (in act 108) to a lighting system which then illuminates an enclosure (act ~~10~~ 110).
